Without SolFarmX

❌ Lost money trying to catch the bottom of SOL's price
❌ Confused by complex farming settings
❌ Missed profitable farming windows due to time or work
❌ Failed to manage risks and close at the right time
❌ Tired of monitoring charts 24/7
❌ Unsure which pools are the most profitable
❌ Lost money on "guaranteed moon" projects
❌ Invested in "high-yield" projects that shut down

With SolFarmX

✅ Smart AI bot monitors profitable pools 24/7
✅ Automatic farming across top Solana pools
✅ Instant reaction to market changes with automated rebalancing & stop-loss
✅ Capital protection through stablecoin pools (USDC)
✅ Risk management & control system
✅ Stable yields up to 1.8% daily
✅ 24/7 AI-powered farming management
✅ Start with as little as 0.1 SOL or 20 USDC

Unique SolFarmX software analyzes thousands of parameters every second to:

- Automatically shift liquidity to the highest-yielding pools on Solana

- Optimize position ranges for maximum returns with minimal impermanent loss

- Safeguard your assets against volatile market swings with dynamic strategies

- Capture all available rewards, airdrops, and protocol incentives effortlessly

- Premium bonus gives access to premium functions.
- A branch = user registered under you (your direct partner).
- You can have unlimited branches in width.
- For minimum turnover, only the branch with maximum turnover is counted (based on your open levels).
- A rank in any branch is valid at any depth, but no deeper than your active levels.
- Side turnover = turnover from all branches not counted in the qualification branches (e.g., volume in branch 3, or branches 3+4, or branches 3+4+5, etc.).

- Achieving a rank grants you a rank bonus.
- The bonus activates after 1 month of rank retention, if required conditions are met.
- If the monthly average deposit or turnover drops below required levels by the end of retention, you can requalify for the bonus later.
- If you achieve a higher rank during retention (from rank 2 upward), the current rank bonus resets, and the countdown restarts.
- After passing retention, the bonus unfreezes 25% weekly over 4 weeks, if conditions stay met.
- To unfreeze each part, you must maintain minimum deposit + turnover.
- If during the unfreezing period deposit/turnover drops below minimum, the remaining frozen bonus is lost; unfrozen funds stay available.
- Unfrozen bonuses can be withdrawn immediately in USDC.

📈 Referral Program Rules Summary

- Levels open when a rank is achieved and close when a rank is lost.
- Structure volume is calculated across all active levels, based on rank.
- Structure + personal volume are summed in USDC (at exchange rate + SOL).
- Rank demotion happens if personal/structure turnover drops below required levels.
- Rank bonuses are awarded only once after all conditions are met.
- Skipped ranks do not count toward rank bonuses.
- Only active staked amounts in the structure count as turnover (withdrawals are excluded).
- Referral payments are added on top of the user's income and paid to their internal account.

How all commision will release

- Let's say you invite someone and they deposit 10 Solana. You'll earn a **20%** commission — that's 2 Solana.

- But here's the thing: you won't be able to withdraw that full 2 Sol instantly. Since your referral can take their money out anytime, we've set it up so commissions are released slowly to keep things fair.
- You'll get 1–3% of your commission every day.

- So in total, it'll take anywhere from 33 to 100 days for you to **receive the full amount.**
